## Artur Fruttero

### About Me

I am a FullStack developer with an unusual background as a physical education teacher. This experience differentiated me due to my soft skills, which also accompanied my technical skills that I acquired and continue to acquire.

My biggest motivation in programming is the constant opportunity to learn and grow in a constantly evolving field. After a few years in the industry, I am lucky to be able to continue repeating that I love my job. I am excited to face new challenges and contribute to projects.

### Experience

FullStack developer - WePlan SA  
2020 - 2/2024.

Since I entered the industry, I have worked for a project for the telecommunications company "Claro".

This project is a system oriented to the company's assistance service and was created from scratch, with a large, experienced and

seeking technical and technological excellence.

The technologies used in the project are:

--**Micro FrontEnds** in **React** with **TypeScript** handled using **Webpack**

--**MicroServices** with **NodeJs** y **Express**

--**Unit test** creation

--**GraphQL** between the backEnd and FrontEnd

--**BitBucket** con **Git** para el Control de versiones

--Handle proxys with **NGINX**

--Deploys with **Kubernetes** in **Openshift**, continuous integration with **Jenkins**

--Agile methodologies using **JIRA**

Important Libraries:

By decision of the architecture team, the smallest possible number of libraries was used, however, the most important of those used were:

--**Geolocalización Google API**

--**Styled Components**

--**React useContext**

--**Lodash**
